

227 criminal records and fingerprints in databases right from home. Jessica's
240 mom could also review crime statistics of burglaries and car thefts in and
251 around their neighborhood. There would also be the opportunity to monitor
261 the whereabouts of convicted and released felons via the publically
268 available State of California Megan's Law database.

278 Jessica's brother, Kyle, would use the computer for his college
289 studies. He could use the Internet to research biology concepts like
298 photosynthesis and genetic mutations. Kyle attended college near their
311 home and commuted daily to campus. He needed access to a computer at
321 home to study for his major in Microbiology at UCLA.

332 Jessica herself would send e-mail and homework assignments to her
344 high school teachers. She would compose and submit her papers in MLA
355 Format using Google Docs. She could research words, concepts, and issues
366 right within the application. She especially liked having her work saved
380 automatically to the cloud, and be able to access her work back at school
395 without having to carry a USB flash drive. Having a new, well-equipped
404 computer would be great for everyone in the family.
